

CASE STUDY

We get the deal done.

Aira acquired All Seasons Energy

ENERGY & ENVIRONMENT

TRANSACTION ANNOUNCEMENT

Translink UK supported the shareholders of All Seasons Energy in the disposal to Aira

Aira delivers innovative and affordable clean energy-tech to accelerate electrification of residential heating, reducing CO2 emissions by 75–100%

All Seasons Energy represents Aira's platform acquisition in the UK market enabling the sellers to grow and present more job opportunities

TRANSACTION HIGHLIGHTS

All Seasons Energy is a UK renewable energy provider, specialising in solar, insulation, and heat pumps. Backed by UK public funding and the energy transition, it has been acquired by Aira, a Swedish company by impact builder Vargas, to disrupt Europe's residential heating market. The acquisition doubles Aira's UK facilities and launches a heat pump training academy.

KEY TAKEAWAYS

- All Seasons, a fast-growing business, needed support to become transaction-ready.
- Translink UK took a hands-on approach, adopting a pragmatic, flexible attitude to decision-making.
- The team assisted with bid reviews, negotiations, financial diligence, deal structuring, and tax matters, collaborating with SPA Advisory and Transaction Tax experts from BHP to ensure a smooth transaction.

“This is an exciting period of growth for All Seasons Energy, which is already a successful, nation-wide and multi-award winning installer. I believe Aira will take us to the next level. We’ll have the resources to make the North of England, a huge part of the green jobs revolution while accelerating the UK’s transition to net zero.”

– Richard Moule, Director at All Seasons Energy
